Metro Water Services Approved Grease Waste Recyclers

The listed Grease Waste Recyclers have signed an agreement stating their intent to abide by the following Metro Water Services (MWS) requirements and Grease Management Policy:

- The grease waste recycling will perform a complete pump of all contents on grease control equipment (GCE) in accordance to the Grease Management Policy and the Food Service Establishment (FSE) permit.
- The grease waste recycling will submit a monthly report to MWS to track volumes of hauled grease waste from MWS jurisdiction.
- The grease waste recycling will submit to records audit to confirm reported data.

This listing of Grease Waste Recyclers is not an all inclusive list of Grease Waste Recyclers doing business in MWS' facilities planning area, but a list of those grease waste recyclers that have signed an agreement to abide by our requirements above. The approved list has been developed by Metro Water Services in an effort to assure the FSE and waste haulers that to the best of our knowledge, the pumping of the GCE will be done in compliance with the FSE permit and that the grease waste will be treated for beneficial reuse.
